

## **Copperhead County**

Copperhead County managed to spread their reputation as a serious southern rock band in a very short time. Inspired by Blackberry Smoke, The Outlaws and many other classics, Copperhead County knows how to capture that warm southern feeling.

They know how southern rock is meant to be.

Mostly original songs about everything in life, brought by Corvin Silvester's intense and warm voice. Robert van Voorden takes care of the typical Copperhead County guitar sound AND feeling. Jordy Duitscher's organ makes sure everything is glued together the way it should be. Rhythm section Alex Stolwijk (drums) and Marja Boender (bass & backing vox) provide the power to the songs to make it a wonderful blend of southern rock songs.

With an international record deal (CRS/Continental Recording Services) in their pockets, the band was set to play shows all over Europe in the fall of 2020 and spring 2021 to celebrate the European release of the "Brothers" album. Unfortunately Covid-19 said NO.

For fall 2020 and spring 2021, Copperhead County will do their best to do as many "corona proof" shows as possible.
